Reflection

- It was a pleasure to organize (and host) the summer school
- The virtual sessions worked generally well
- We had good discussions
- Various attendees not able to attend a session watched the YouTube
- We will send a survey to you (soon) to ask you for feedback!

Outlook

Summer School in August 2021

- Update in topics
- Will take place in Reading (if the situation permits)
- We will attempt to additionally offer (open) virtual sessions

Towards Certification with the HPC Certification Forum

Goals of the forum:

- Fine-grained standardizing HPC knowledge representation
- Establishing international certificates attesting knowledge
- Supporting an ecosystem around the HPC competences
- Check: <https://hpc-certification.org>

Farewell

- Thanks for attending
- We hope you can make good use of the school
- Best wishes for your future

The ESiWACE project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No **675191** and **823988**
